

## **2G Energy Strengthens Its Service Business in Italy through the Acquisition of S.G. S.r.l.**

**Heek / San Martino Buon Albergo, August 12, 2026** – 2G Energy AG continues to expand its international service organization by acquiring 100% of the shares in the Italian service company S.G. S.r.l., headquartered in San Martino Buon Albergo near Verona.

Founded in 2004, the company employs around 20 people and specializes in the service and maintenance of combined heat and power (CHP) plants. With more than 250 CHP systems under service throughout Italy – including a significant number under full-service maintenance contracts – S.G. has established a strong market presence and extensive technical expertise in the Italian CHP market.

The acquisition represents another important step in 2G's international growth strategy while further strengthening its service business. Within the 2G Group, service is regarded as a key pillar for sustainable growth, long-term customer relationships, and ensuring the high availability of installed systems.

"Service has always been an integral part of 2G's DNA and forms the backbone of our business model. By acquiring S.G., we are strengthening our presence in an important European market and creating the foundation to serve our customers in Italy even faster, closer, and with an even broader range of services. At the same time, we are establishing a strong platform for further profitable growth in the region," said Pablo Hofelich, CEO of 2G Energy AG.

Following the transaction, the current owners will transfer the company to 2G, while the two founders, Mariusz Sedzik and Marco Gasparini, will remain in their roles as Managing Directors of S.G. This ensures continuity in local market expertise as well as the long-standing relationships with customers.

"We are proud to become part of the 2G Group. Combining our many years of service experience in the Italian market with 2G's technological expertise and international resources creates exciting new opportunities for our customers. Together, we look forward to further developing the Italian market and contributing our expertise even more effectively," said Mariusz Sedzik, Managing Director of S.G. S.r.l.

For S.G.'s existing customers, day-to-day contacts and the established service organization will remain unchanged. At the same time, they will benefit from the technical resources, digital service processes, and international innovative strength of the 2G Group.

### **About 2G Energy AG**

2G Energy AG Group is a leading international manufacturer and systems provider of equipment for decentralized energy supply. The company develops, manufactures, and installs comprehensive solutions in the structurally growing market for high-efficiency combined heat and power (CHP) systems, large-scale heat pumps, and peak-load generators. Digital grid integration and system control for these three types of energy generation systems, as well as service and maintenance offerings, are further key performance criteria. The product portfolio comprises three types of energy generation systems: CHP plants with capacities ranging from 20 kW to 4,500 kW for operation with hydrogen, natural gas, biogas, and other low-calorific gases; large-scale heat pumps with capacities ranging from 100 kW to 3,200 kW; and peak-load generators with electrical output starting at 500 kW. CHP systems operate at efficiencies of 90 percent and higher. The efficiency of large-scale heat pumps is expressed by the performance coefficient and can reach up to 5, depending on operating conditions. With its products and services, 2G is at the forefront of a decentralized, secure, and largely decarbonized energy supply. Worldwide, more than 10,000 installed

2G systems are already supplying a wide range of customers - including companies in the housing sector, agriculture, commercial and industrial enterprises, energy providers, municipal utilities, and local governments - with electrical and thermal energy across a variety of applications.

#### **About S.G. S.r.l.**

S.G. S.r.l. is an Italian company based in San Martino Buon Albergo, near Verona. Founded in 2004, the company specializes in the installation, maintenance, and technical support of combined heat and power (CHP) systems. Among other services, S.G. S.r.l. offers full-service maintenance, repairs, diagnostics, and spare parts supply, and serves customers throughout Italy.
