2G Energy released its **Q3 results** on Monday. The slower development shown was explained by lower revenues in the areas of new equipment and service. In the service area, the ERP introduction led to a temporary decline in business in Germany during Q3 and in October. In the equipment business, the late approval of the German biomass package provided for further headwind during the quarter. Development of profitability was better than anticipated though as **EBIT met the forecast level despite the top-line shortfall**. 2G already revised its full-year guidance at the end of October. As most of the ERP issues should have been resolved, the record-high order backlog (~EUR 250m at the end of Q3, +7% yoy) should facilitate a surge in sales in Q4, mirroring the typical seasonal pattern. The **main growth drivers for 2026 and beyond remain intact**:

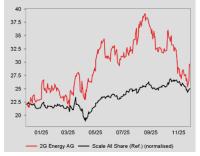

- **German biomass market**: With the approval of the German biomass package by the EU Commission, upcoming tender volumes are set to increase. The required over-build for flexible operation will stimulate increasing equipment demand from 2026 onwards, which should add > EUR 50m to annual sales for the time being.
- Gas power plants represent another growth opportunity as auctions will be held in Germany in 2026 for a total of 10GW controllable capacity. As large gas turbines are partially in short supply already and a variable load profile eliminates cost disadvantages, smaller plants incorporating gas engines should capture a material market share and can be built and scaled more quickly. Ukraine represents another opportunity.
- The **build-out of data centers** stimulate demand for onsite energy supply. Gas-powered engines represent an affordable, reliable and, above all, timely solution. Such larger contracts can provide the opportunity for scale in serial production and the 24/7 use-case supports the generation of higher margin service business. Orders are expected to increase from 2026 onwards, hence adding to the near-term growth.

The Buy rating and PT of EUR 41 are being maintained and the recent share price setback is considered as a buying opportunity against the background of the expected strong growth in the upcoming FYs.

Comment on Changes:

- 2025 estimates are slightly reduced in light of low Q3 revenues
- 2G guides for sales of EUR 440–490m in 2026. The WR estimate, which is slightly below the midpoint, appears conservative considering the growth prospects

Company Background

- Established in 1995, 2G Energy released its first CHP in 1996, followed by the first biogas application in 1999
- Prior to its IPO in 2007, 2G already expanded its local footprint and entered international markets with the shipping of a CHP to Japan
- After the IPO, several international subsidiaries were formed to push the further international expansion
- In 2009, natural gas CHPs were introduced to the market, establishing a key pillar for future growth. In addition, the international expansion gained traction in the US and European countries.
- After pioneering the digitization of CHPs with its unique platform in 2016, the first hydrogen CHP was introduced in 2018. In 2023, 2G Energy added large heat-pumps to its product offering.

Competitive Quality

- Founded in 1995, 2G Energy quickly positioned as technology leader for biogas CHPs in Europe. Innovative designs, best-in-class performance and quality standards improved 2G's positioning.
- Offering a fitting solution for different client groups, 2G Energy stands out from its peer-group with its extensive product portfolio.
- Combining high quality products with an extensive service offering, 2G seeks to deliver best-in-class total cost of ownership for variing use-cases.
- Further product developments and an early move into the hydrogen CHP and large heat pump market provides for an additional competitive edge.
- Covering all integral parts of the value chain, 2G Energy is perfectly equipped to defend its market position and access growth.

- We have computed three different growth and valuation scenarios (base, accelerated, downward)
- As main valuation indicator, we apply our base-case DCF-valuation
- Internal efficiency measures, increasing service revenues and operating leverage boost EBIT-margin generation
- Sales is expected to experience a steep growth, reflecting the roadmap to net zero until 2030/35

This research report ("investment recommendation") was prepared by the Warburg Research GmbH, a fully owned subsidiary of the M.M.Warburg & CO (AG & Co.) KGaA and is passed on by the M.M.Warburg & CO (AG & Co.) KGaA. It is intended solely for the recipient and may not be passed on to another company without their prior consent, regardless of whether the company is part of the same corporation or not. It contains selected information and does not purport to be complete. The investment recommendation is based on publicly available information and data ("information") believed to be accurate and complete. Warburg Research GmbH neither examines the information for accuracy and completeness, nor guarantees its accuracy and completeness. Possible errors or incompleteness of the information do not constitute grounds for liability of M.M.Warburg & CO (AG & Co.) KGaA or Warburg Research GmbH for damages of any kind whatsoever, and M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH are not liable for indirect and/or direct and/or consequential damages. In particular, neither M.M.Warburg & CO (AG & Co.) KGaA nor Warburg Research GmbH are liable for the statements, plans or other details contained in these investment recommendations concerning the examined companies, their affiliated companies, strategies, economic situations, market and competitive situations, regulatory environment, etc. Although due care has been taken in compiling this investment recommendation, it cannot be excluded that it is incomplete or contains errors. M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH, their shareholders and employees are not liable for the accuracy and completeness of the statements, estimations and the conclusions derived from the information contained in this investment recommendation. Provided a investment recommendation is being transmitted in connection with an existing contractual relationship, i.e. financial advisory or similar services, the liability of M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH shall be restricted to gross negligence and wilful misconduct. In case of failure in essential tasks, M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH are liable for normal negligence. In any case, the liability of M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH is limited to typical, expectable damages. This investment recommendation does not constitute an offer or a solicitation of an offer for the purchase or sale of any security. Partners, directors or employees of M.M.Warburg & CO (AG & Co.) KGaA, Warburg Research GmbH or affiliated companies may serve in a position of responsibility, i.e. on the board of directors of companies mentioned in the report. Opinions expressed in this investment recommendation are subject to change without notice. The views expressed in this research report accurately reflect the research analyst's personal views about the subject securities and issuers. Unless otherwise specified in the research report, no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views contained in the research report. DISCLOSURE ACCORDING TO §85 OF THE GERMAN SECURITIES TRADING ACT (WPHG), MAR AND MIFID II INCL. COMMISSION DELEGATED REGULATION (EU) 2016/958 AND (EU) 2017/565

The valuation underlying the investment recommendation for the company analysed here is based on generally accepted and widely used methods of fundamental analysis, such as e.g. DCF Model, Free Cash Flow Value Potential, NAV, Peer Group Comparison or Sum of the Parts Model (see also http://www.mmwarburg.de/disclaimer/disclaimer.htm#Valuation). The result of this fundamental valuation is modified to take into consideration the analyst's assessment as regards the expected development of investor sentiment and its impact on the share price.

Independent of the applied valuation methods, there is the risk that the price target will not be met, for instance because of unforeseen changes in demand for the company's products, changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rate etc. For investments in foreign markets and instruments there are further risks, generally based on exchange rate changes or changes in political and social conditions.

This commentary reflects the opinion of the relevant author at the point in time of its compilation. A change in the fundamental factors underlying the valuation can mean that the valuation is subsequently no longer accurate. Whether, or in what time frame, an update of this commentary follows is not determined in advance.

Additional internal and organisational arrangements to prevent or to deal with conflicts of interest have been implemented. Among these are the spatial separation of Warburg Research GmbH from M.M.Warburg & CO (AG & Co.) KGaA and the creation of areas of confidentiality. This prevents the exchange of information, which could form the basis of conflicts of interest for Warburg Research GmbH in terms of the analysed issuers or their financial instruments.

The analysts of Warburg Research GmbH do not receive a gratuity – directly or indirectly – from the investment banking activities of M.M.Warburg & CO (AG & Co.) KGaA or of any company within the Warburg-Group.

All prices of financial instruments given in this investment recommendation are the closing prices on the last stock-market trading day before the publication date stated, unless another point in time is explicitly stated.

M.M.Warburg & CO (AG & Co.) KGaA and Warburg Research GmbH are subject to the supervision of the Federal Financial Supervisory Authority, BaFin. M.M.Warburg & CO (AG & Co.) KGaA is additionally subject to the supervision of the European Central Bank (ECB).
