

## 2G signs framework agreement with Centrica Business Solutions UK Ltd on the supply of CHP systems

**2G Energy AG, one of the world's leading manufacturers of gas-fueled CHP systems, signed a framework agreement on the supply of combined heat and power (CHP) systems with Centrica Business Solutions UK Ltd.**

Heek, 01/30/2023: For years now, expanding the partner network has been an important pillar of the strategic orientation of 2G Energy AG. In Centrica Business Solutions UK, 2G gained another key partner. "With this agreement, the British company reacts to the growing demand for integrated hydrogen solutions which are as key to decarbonizing the energy supply in Great Britain as they are in Germany. So, the fact that, going forward, Centrica will cooperate with 2G to offer highly efficient combined heat and power solutions fit for hydrogen to its customers is further proof that 2G is recognized as an international technological leader," explains CTO Frank Grewe.

### Distribution beyond the UK

Centrica Business Solutions will offer the cogeneration systems by 2G in Great-Britain, Ireland, the Netherlands, and Italy. Furthermore, partnering with 2G enables Centrica to gain a foothold in growth markets for renewable gases. To Greg McKenna, Managing Director of Centrica Business Solutions, this partnership reflects the general trend to reduce emissions: "Our customers are completely focused on "Net Zero." The partnership with 2G for CHP engines capable of operating on hydrogen expands the range of technologies already offered by us to support our customers on their way to decarbonization."

## **About 2G Energy**

The 2G Energy AG is one of the world's leading manufacturers of combined heat and power generation systems (CHP) providing a decentralized supply of heat and electricity using reciprocating piston engines that run on natural gas, biomethane, biogas, sewage gas, landfill gas or hydrogen. The systems in the portfolio range from an electrical output of 20 to 4,500 kW. The customers range from farmers over municipalities, commercial enterprises, medium-scale, and big industrial companies to the energy sector. In addition to the headquarters in Heek, located in the "Münsterland" region in western Germany, 2G is represented by subsidiaries in several European countries as well as North America and has about 800 employees worldwide. Since its foundation in 1995, 2G has commissioned more than 8,000 systems throughout the world.

## **About Centrica Business Solutions UK**

Centrica Business Solutions produces, operates, and maintains highly profitable energy systems helping companies on their way towards decarbonization. Centrica specializes in on-site energy solutions incorporating CHP systems capable of operating on hydrogen as well as extensive photovoltaic systems and heat pumps for the public sector and big industrial companies. The company's portfolio includes CHP systems with a total output over 700 MW in Great Britain, the US, Italy, and the Netherlands.
